

# Artwork Guidelines – 2 Twists with Flexilink

- Create your graphics on a single oversized Quark document eg 1200 x 800mm
- Work at 1/4 actual size
- At full size:  
Straight panels are 800 x 2000mm  
Flexilinks are 550 x 2000mm
- Add a visible cutting guide to indicate the top of your graphics
- Manually draw vertical HAIRLINE crops corresponding to the exact width of each panel
- Add horizontal crops to show the base
- Allow 20mm bleed around your layout
- AVOID TEXT BREAKS OVER PANELS wherever possible ie individual characters crossing over adjacent panels
- Work in CMYK & at 1/4 size with all images around 300dpi at 100% or equivalent
